Abstract

Your thesis must contain an abstract. A good reference for thesis writing is **?**; we highly recommend that you study this or a similar book during your studies. He writes the following about the abstract:

> An abstract is typically a single paragraph of about 50 to 200 words. The function of an abstract is to allow readers to judge whether or not the paper is of relevance to them. It should therefore be a concise summary of the paper's aims, scope, and conclusions. There is no space for unnecessary text; an abstract should be kept to as few words as possible while remaining clear and informative. Irrelevancies, such as minor details or a description of the structure of the paper, are inappropriate, as are acronyms, abbreviations, and mathematics. Sentences such as "We review relevant literature" should be omitted.
>
> The more specific an abstract is, the more interesting it is likely to be. Instead of writing "space requirements can be significantly reduced", write "space requirements can be reduced by 60%". Instead of writing "we have a new inversion algorithm", write "we have a new inversion algorithm, based on moveto-front lists".
>
> Many scientists browse research papers outside their area of expertise. You should not assume that all likely readers will be specialists in the topic of their paper-abstracts should be self-contained and written for as broad a readership as possible. Only in rare circumstances should an abstract cite another paper (for example, when one paper consists entirely of analysis of results in another), in which case the reference should be given in full, not as a citation to the bibliography. Bibliography

A. Additional Experimental Results

? writes:

> Some papers have appendices giving detail of proofs or experimental results, and, where appropriate, material such as listings of computer programs. The purpose of an appendix is to hold bulky material that would otherwise interfere with the narrative flow of the paper, or material that even interested readers do not need to refer to. Appendices are rarely necessary. (**?**)

In the context of a BSc or MSc thesis, the last sentence often does not hold.
